Re: Monthly report December 2020

Fire Plan Reviews-6

Fire Inspections-5

One fire with damage and cost-4623 Riversedge Village Lane, PI, FL 32127

On December 31, 2020 at 22:10 hours, E-78 and M-78 responded emergency to a fire alarm at the address stated above. On arrival the crew noted the fire alarm was sounding, the fire pump was running and a citizen advised the Lt. "sprinklers were putting out a fire in the trash dumpster" Lt. Young investigated and discovered that a lone sprinkler head in the trash dumpster room was extinguishing a fire. Lt. Young then moved to the nearest isolation valve and closed it to prevent further water damage as the fire was out at that point. E-78 and M-78 then rolled the dumpster out of the building. Lt. Young then instructed Central to contact C-79 by phone, which they did at 22:18 hours and C-79 arrived at 22:36 hours. After assessing the situation including the fire area, FACP, FP room and a fifth-floor mechanical room, C-79 advised C-78 of the situation and assured him that it was under control and he did not need to respond. There were no injury or fatality at the scene of this fire. One sprinkler head fused and was replaced in the trash dumpster room, a TYCO K-14, ELO pendant with 7/8" orifice. The smoke detector was ruined by water in the room and was removed and taken offline in the fully addressable panel, a Notifier AFP-200. This detector was removed by the alarm contractor, DynaFire and then replaced and placed back online on 1-4-2021, the next business day. After replacement of the sprinkler head, the isolation valve was opened slowly and the cross-main refilled without incident. The fire pump was placed in automatic per the instructions on the panel. It took several minutes to obtain an "alarm acknowledge and alarm silence" on the FACP, which resulted in an ongoing alarm condition. After several try's the FACP finally displayed the acknowledge and

silence and the FACP was then cleared and placed in full service without further incident.

Upon investigation of the cause and origin of the fire, spent fireworks (photo #3,4,6,7,8,9,10,11,12) had been placed in the dumpster after having been fired outside. These fireworks were still hot and then caught the existing trash in the dumpster on fire. The area in question was under surveillance. C-79 summoned a PIPD officer to the scene to show the evidence of fire to the officer. The officer stated that since the fire was started without malicious intent that it was not criminal in nature.

C-79 ordered the dumpster left outside until the smoke detector was replaced, no trash chute use until further notice and that the management remind all residents that fireworks are not allowed and are illegal in Ponce Inlet. After the smoke detector was replaced, the use of the dumpster and trash chute was returned to normal use.

In summary: This fire was unintentional, the **cause** was due to a careless act of placing hot, burning fireworks remains in an interior trash dumpster by a person or persons that should have known not to do this. The point of **origin** was in a steel trash dumpster in the parking garage of a five story multi-family building that is comprised of 32 units. There were no injury or fatality to any civilian or fire personnel at this incident. It is estimated that this incident cost less than \$1,000.00 in sprinkler, alarm and detection devices, including the service call.

Most Respectfully,

Deputy Chief N.J. Taylor/Fire Marshal

MEMORANDUM
TOWN OF PONCE INLET
FIRE DEPARTMENT

The Town of Ponce Inlet staff shall be professional, caring, and fair in delivering community excellence while ensuring Ponce Inlet citizens obtain the greatest value for their tax dollar.
