

MEMORANDUM

TOWN OF PONCE INLET OFFICE OF THE FIRE CHIEF

The Town of Ponce Inlet staff shall be professional, caring, and fair in delivering community excellence while ensuring Ponce Inlet citizens obtain the greatest value for their tax dollar.

To: Mike Disher, Interim Town Manager
From: Daniel Scales, Public Safety Director *pro tem*
Date: February 13, 2023
Subject: January 2023 Fire Department Report

Attached to this memo are the following items.

- Department incident summary for the month of January (with graph)
- Report from the Deputy Fire Chief/Fire Marshal summarizing his activities for the month as well as the three duty shifts
- January fire training summary for the fire department
- Summary of activities from fire department Office Manager

The Ponce Inlet Fire Department (PIFD) responded to 109 incidents for the month of January, with 67 of the responses falling under the EMS category.

The fire department transported 46 patients in January: 13 transports from Ponce Inlet, 33 from out-of-district; the average number of transports in 24 hours was 1.5. There were 2 times in January that Ponce Inlet needed an outside agency to transport. The Ponce Inlet Fire Department has a minimum staffing requirement of 4 shift personnel; while 2 personnel will be sent for an out-of- district transport, 2 personnel remain in town and the county performs reciprocal transport until our ambulance returns.

In January the fire department responded to a significant structure in fire in Ponce Inlet and was assisted by the cities of Port Orange, South Daytona, and Daytona Beach Shores.

Also in January, the fire department took delivery of state-of-the-art Self-Contained Breathing Apparatus (SCBA). The new units are of the latest design, with increased communication capability and built in infrared fire detection equipment. The new SCBA units will significantly enhance firefighter safety and efficiency. (Picture 2)

Fire Department turnout data is included with the other call related information. The fire department's goal is to have the 90th percentile time for both medical and fire calls meet the NFPA standards. In January, the fire department met the 90th percentile for fire responses. The 90th percentile for fire department EMS responses for January was close to the NFPA standard.

To provide the public with more fire department response data, we are including hyperlinks to heat maps of the various fire department responses. The intent of the heat maps is to demonstrate concentrations of calls within the community. This is a requirement of the accreditation process. Links to the heat maps can also be found on the Town's website under the fire department section.

NOTE: Each map link will launch in an individual web browser.
